I benefit from listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides variety, quality, and for the most part, commercial free service that I can not obtain elsewhere. I have two receivers, one at home and one in our car. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
